#1	Dust	Security mobile	23/07/21	Resident (Weston) concerned about black dust particles on her washing and surfaces in her home.	Explained our 5 dust deposition gauges and results being within limits and quite low recently. Investigation found that a water cart had been in operation on roads, with no visible dust emissions. Some residential chimneys were in use nearby. No other obvious sources. Wind was from SW. Advised resident.	Closed

Via UGL environment officer, working	28/03/23	Some workers had complained about dust coming from the 7A furnace building where waste was being loaded into dump trucks.	On inspection, a water cart was in the south tub of the furnace wetting down the waste. After the water cart left the building we watched two dump trucks getting loaded and	Closed

#3	Dust	Via UGL environment officer, working on Hunter Power Project	8/07/23	Some workers had complained about dust coming from the containment cell, assumed to be gypsum due to its nature and location. This was between 9am and 10am.	This occurred on a weekend when no waste material was being placed. A water cart did wet the area down at around 10.55am, however dust was being produced again at around 1pm. As there is less activity on weekends, we have asked our contractor to check the weather forecast for Saturdays, Sundays and RDO's and if it looks like strong westerly winds are forecast to have a water cart on standby to attend site.
