EXECUTIVE SUMMARY

Hydro Aluminium Kurri Kurri Pty Ltd (Hydro) owns and operates the former Hydro Kurri Kurri Aluminium Smelter (the Smelter) located at Hart Road Loxford, New South Wales (NSW) within the Cessnock City Council local government area.

State Significant Development (SSD) 6666 development consent was issued under Part 4 of the NSW *Environmental Planning and Assessment Act 1979* on 23 December 2020 for remediation of the Smelter (the project).

The Compliance Report has been prepared in accordance with *the Compliance Reporting Post Approval Requirements* (Department, 2020) (the Compliance Reporting PAR) and conditions C11 and C12 of SSD 6666:

C11. Within three months after the commencement of remediation works, and in the same month each subsequent year (or such other timing as agreed by the Planning Secretary), the Applicant must submit a Compliance Report to the Planning Secretary reviewing the environmental performance of the development to the satisfaction of the Planning Secretary. Compliance Reports must be prepared in accordance with the Compliance Reporting Post Approval Requirements (Department, 2020) and must also:

- (a) identify any trends in the monitoring data over the life of the development;*
- (b) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and*
- (c) describe what measures will be implemented over the next year to improve the environmental performance of the development.*

C12. The Applicant must make each Compliance Report publicly available no later than 60 days after submitting it to the Planning Secretary and notify the Planning Secretary in writing at least 7 days before this is done.

This is the first Compliance Report for the Project, which was required to be submitted within three months of the commencement of remediation works. This Compliance Report is for the period 27 January 2021 to 24 April 2021

Remediation works commenced on 27 January 2021. However due to the requirements relating to the Voluntary Planning Agreement (condition A5 of the development consent) and the Independent Engineer's Deed (condition A8) limited activities have commenced, and works were suspended on 27 March 2021 until the requirements of conditions A5 and A8 can be addressed.

The Compliance Table (refer to Appendix 1) found the following in relation to compliance with development consent conditions:

Compliance status	Number of conditions
Compliant	52
Non-compliant	0
Not triggered	42
Total number of conditions	94

No complaints have been received regarding the Project, and no non-compliances or incidents have been recorded.

The environmental monitoring, inspections and reporting programs implemented by Hydro and the Remediation Contractor, Daracon, have not identified adverse environmental issues, or trends in monitoring data that may indicate a potential environmental issue.

The following actions are recommended to improve the environmental management and reporting documentation:

- Section 3.5.1.1 ('Remediation Compliance Reporting') of the RWEMP to be amended to reflect the final development consent conditions. The amended RWEMP will be submitted to the Department in accordance with conditions C4 and C5
- A complaint register to be placed on the Project website (even if no complaints have been received).

Hydro is consulting with the Department and Hunter New England Health to remove the requirement of condition B53(d) for the Stakeholder and Community Engagement Plan (SEP) to *"identify a community notification area for residents to refrain from using rainwater as a potable water supply during the remediation work"*. Hydro submitted a request for removal of this requirement. The Department required Hydro to consult with Hunter New England Health to seek their agreement to this change (a comment in one of their submissions was the source of this requirement). Hydro issued a letter to Hunter New England Health seeking their agreement to Hydro's request to remove the community notification area. As of 24 April 2021, no response has been received from Hunter New England Health.

1. INTRODUCTION

1.1 Project overview

Hydro Aluminium Kurri Kurri Pty Ltd (Hydro) owns and operates the former Hydro Kurri Kurri Aluminium Smelter (the Smelter) located at Hart Road Loxford, New South Wales (NSW) within the Cessnock City Council local government area.

The project locality is shown on **Figure 1-1**. The site is approximately 80 hectares (ha) and is surrounded by approximately 2,000 hectares of buffer zone land that is also owned and managed by Hydro.

State Significant Development (SSD) 6666 development consent was issued under Part 4 of the NSW *Environmental Planning and Assessment Act 1979* on 23 December 2020 for remediation of the Smelter (the project). SSD 6666 generally approves the following activities:

- Establishment of environmental controls such as erosion and sediment and water quality controls
- Construction of the Containment Cell including base and capping layers
- Construction of a haul road to the Containment Cell
- Excavation of contaminated soils within the Site
- Removal of the Capped Waste Stockpile
- Transport of material removed from the Capped Waste Stockpile, excavated contaminated soils (including stockpiled soils sourced from other Hydro owned land) and non-recyclable demolition materials to the Containment Cell
- Placement of these materials in the Containment Cell
- Leachate and stormwater management/monitoring
- Filling and grading following removal of contaminated materials
- Leachate management system, pumping well network and dam decommissioning.

1.2 Summary of activities in the reporting period

The remediation works commenced on 27 January 2021. The following activities were undertaken during the compliance reporting period:

- Establishment of the temporary Remediation Contractor's compound and the contractor ancillary facilities
- Delivery and mobilisation of limited plant and equipment
- Establishment of stockpile areas
- Installation of temporary fencing and signage and environmental controls
- Removal of an Aboriginal relic located within the Containment Cell footprint
- Commencement of construction of the access between the Capped Waste Stockpile and Containment Cell (still under construction)
- Pre-clearance vegetation survey by ecologists
- Clearance of native vegetation within the Containment Cell footprint under observation by ecologists
- Construction of fauna proof fencing around the Containment Cell footprint
- Excavation of subsurface materials not to be used in Containment Cell construction
- Commencement of construction of a Containment Cell perimeter access track (still under construction)
- Commencement of construction of temporary water storage dams adjacent to the Containment Cell, comprised of three sediment detention basins and one leachate storage pond (still under construction).

Due to the requirements relating to the Voluntary Planning Agreement (condition A5 of the development consent) and the Independent Engineer's Deed (condition A8) limited activities have commenced, and works were suspended on 27 March 2021 until the requirements of conditions A5 and A8 can be addressed.

1.3 Key contacts

The names and contact details of the key personnel who are responsible for the environmental/compliance management of the development are listed in **Table 1-1**.

Daracon Contractors Pty Ltd (Daracon) has been contracted as the Construction and Remediation Contractor to undertake remediation of the Smelter site and to construct the Containment Cell.

1.4 Compliance reporting

1.4.1 Compliance reporting objectives

This Compliance Report has been prepared by Ramboll Australia Pty Ltd (Ramboll) on behalf of Hydro to monitor and report on the compliance status of the Project in relation to the development consent.

The Compliance Reporting ensures that:

- the project's performance in terms of compliance with conditions of consent is evaluated on the basis of monitoring data and is communicated at various stages during the carrying out of the development
- the reporting obligations required by the conditions of consent are met
- opportunities for improvement are identified and adopted.

1.4.2 Compliance reporting scope

The Compliance Report has been prepared in accordance with *the Compliance Reporting Post Approval Requirements* (Department, 2020) (the Compliance Reporting PAR). The structure of this report is consistent with the Compliance Reporting PAR.

The requirement for Compliance Reporting is outlined in conditions C11 and C12 of SSD 6666 as follows:

C11. Within three months after the commencement of remediation works, and in the same month each subsequent year (or such other timing as agreed by the Planning Secretary), the Applicant must submit a Compliance Report to the Planning Secretary reviewing the environmental performance of the development to the satisfaction of the Planning

Secretary. Compliance Reports must be prepared in accordance with the Compliance Reporting Post Approval Requirements (Department, 2020) and must also:

- (d) identify any trends in the monitoring data over the life of the development;*
- (e) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and*
- (f) describe what measures will be implemented over the next year to improve the environmental performance of the development.*

C12. The Applicant must make each Compliance Report publicly available no later than 60 days after submitting it to the Planning Secretary and notify the Planning Secretary in writing at least 7 days before this is done.

1.4.3 Compliance reporting period

This Compliance Report is for the period 27 January 2021 to 24 April 2021.

2. PREVIOUS REPORT ACTIONS

As this is the first Compliance Report, there are no previous actions to report.

3. COMPLIANCE STATUS SUMMARY

3.1 Compliance status descriptors

The status of each compliance requirement during the reporting period has been recorded by using the descriptors in **Table 3-1**.

Table 3-1: Compliance status descriptors

Compliance status	Description
Compliant	The proponent has collected sufficient verifiable evidence to demonstrate that all elements of the requirement have been complied with.
Non-compliant	The proponent has identified a non-compliance with one or more elements of the requirement.
Not triggered	A requirement has an activation or timing trigger that has not been met at the phase of the development when the compliance assessment is undertaken, therefore an assessment of compliance is not relevant.

3.2 Compliance summary

Compliance performance with the development consent was determined from a review of project documentation, observations, and interviews with site representatives.

A summary of the compliance performance is provided in **Table 3-2**. The assessment of compliance with each development consent condition is documented within **Appendix 1**.

Table 3-2: Compliance summary

Compliance status	Number of conditions
Compliant	52
Non-compliant	0
Not triggered	42
Total number of conditions	94

3.3 Non-compliances

No non-compliances were observed or reported during the compliance reporting period.

3.4 Incidents

No incidents occurred during the compliance reporting period.

3.5 Complaints

No complaints were received during the compliance reporting period.

4. ENVIRONMENTAL PERFORMANCE

4.1 Environmental management

4.1.1 Management plans

Hydro operates in accordance with a Remediation Works Environmental Management Plan (RWEMP), as required under condition C2 of the development consent. The RWEMP provides a system and procedures to establish and maintain controls to manage potential environmental impacts during post closure activities of the Smelter. The RWEMP includes the following appendices as required under the development consent:

- Containment Cell Management Plan (CCMP)
- Air Quality Management Plan (AWMP)
- Erosion and Sediment Control Plans (ESCP)
- Biodiversity Management Plan (BMP)
- Stakeholder and Community Engagement Plan (SEP)
- Work Health and Safety Management Plan (WHSMP)

Other specialist management plans have been prepared for certain environmental aspects and included as appendices to the RWEMP:

- Smelter Access Plan (SAP)
- Traffic Management Plan (TMP)
- Noise and Vibration Management Plan (NVMP)
- Soil and Water Management Plan (SWMP), including a Contaminated Soil Management Plan (CSMP) and a Leachate Management Plan (LMP)
- Waste Management Plan (WMP)
- Energy Efficiency Management Plan (EEMP)
- Aboriginal Heritage Management Plan (AHMP).

In addition, the Pollution Incident and Emergency Response Management Plan (PIRMP) describes the procedures to be implemented if a pollution incident occurs at the Smelter.

4.1.2 Site inspections

Site inspections of the works are undertaken on a regular basis in accordance with the RWEMP. These include:

- A weekly inspection by the Daracon Project Manager and Supervisor of environmental controls and the general condition of the site.
- A weekly inspection by the Hydro Environmental Officer and the Hydro Work Health and Safety (WHS) Manager of the environmental and WHS controls. An inspection will also be undertaken after a rain event (greater than 5 millimetres in any one period up to 24 hours in duration).
- A monthly environmental performance inspection by the Ramboll Environmental Representative.

4.2 Air quality

4.2.1 Background

Air quality monitoring is undertaken at five locations via dust deposition gauges (DDG1, DDG2, DDG3, DDG4 and DDG5). The dust deposition gauges were established in December 2016 prior to the commencement of demolition activities. Results are collected for total insoluble material on a monthly basis.

The air quality assessment criteria applicable to the site are those specified by the NSW Environment Protection Authority (EPA) within the *Approved Methods for the Modelling and Assessment of Air Pollutants in NSW* (2005). Impacts from PM₁₀ and total suspended particulate (TSP) matter are considered the most relevant pollutants for the project. The specific goal that will be applicable at surrounding receptors (through the results at the five dust deposition monitoring stations) is an annual incremental impact of deposited dust of 4g/m²/month.

A meteorological station has also been established in the south east of the Smelter site to capture daily observations of wind speed, temperature, relative humidity, and rainfall.

4.2.2 Trends in the monitoring data

Figure 6-1 presents the dust deposition monitoring data from December 2016 to March 2021. Only one round of monitoring exceeded the criteria for dust deposition which was during the February 2020 bushfires. The results since the commencement of the remediation works are below the deposited dust target of less than 4g/m²/month.

4.2.3 Actual versus predicted impacts

Air quality modelling undertaken for the EIS indicated that the predicted incremental and cumulative concentrations and deposition rates will be below the applicable EPA assessment criteria and *National Environment Protection (Ambient Air Quality) Measure* advisory reporting goals at all the sensitive receiver locations.

This prediction is consistent with the monitoring results for the compliance reporting period.

4.3 Noise and vibration

4.3.1 Background

Noise and vibration monitoring are only proposed to be undertaken in response to substantiated noise or vibration complaints in order to validate and assess the source(s) giving rise to complaint(s).

4.3.2 Trends in the monitoring data

No noise or vibration complaints were received during the compliance reporting period requiring validation monitoring to be undertaken.

4.3.3 Actual versus predicted impacts

Noise modelling undertaken for the EIS indicated that the predicted noise levels associated with the modelled worst-case scenario would comply with the standard construction hours noise criteria at all noise sensitive receivers.

The vibration assessment undertaken for the EIS concluded it is unlikely that there would be any vibration impacts that would give rise to annoyance or structural damage at any of the nearest receivers.

These predictions are consistent with the results for the compliance reporting period based on the absence of complaints.

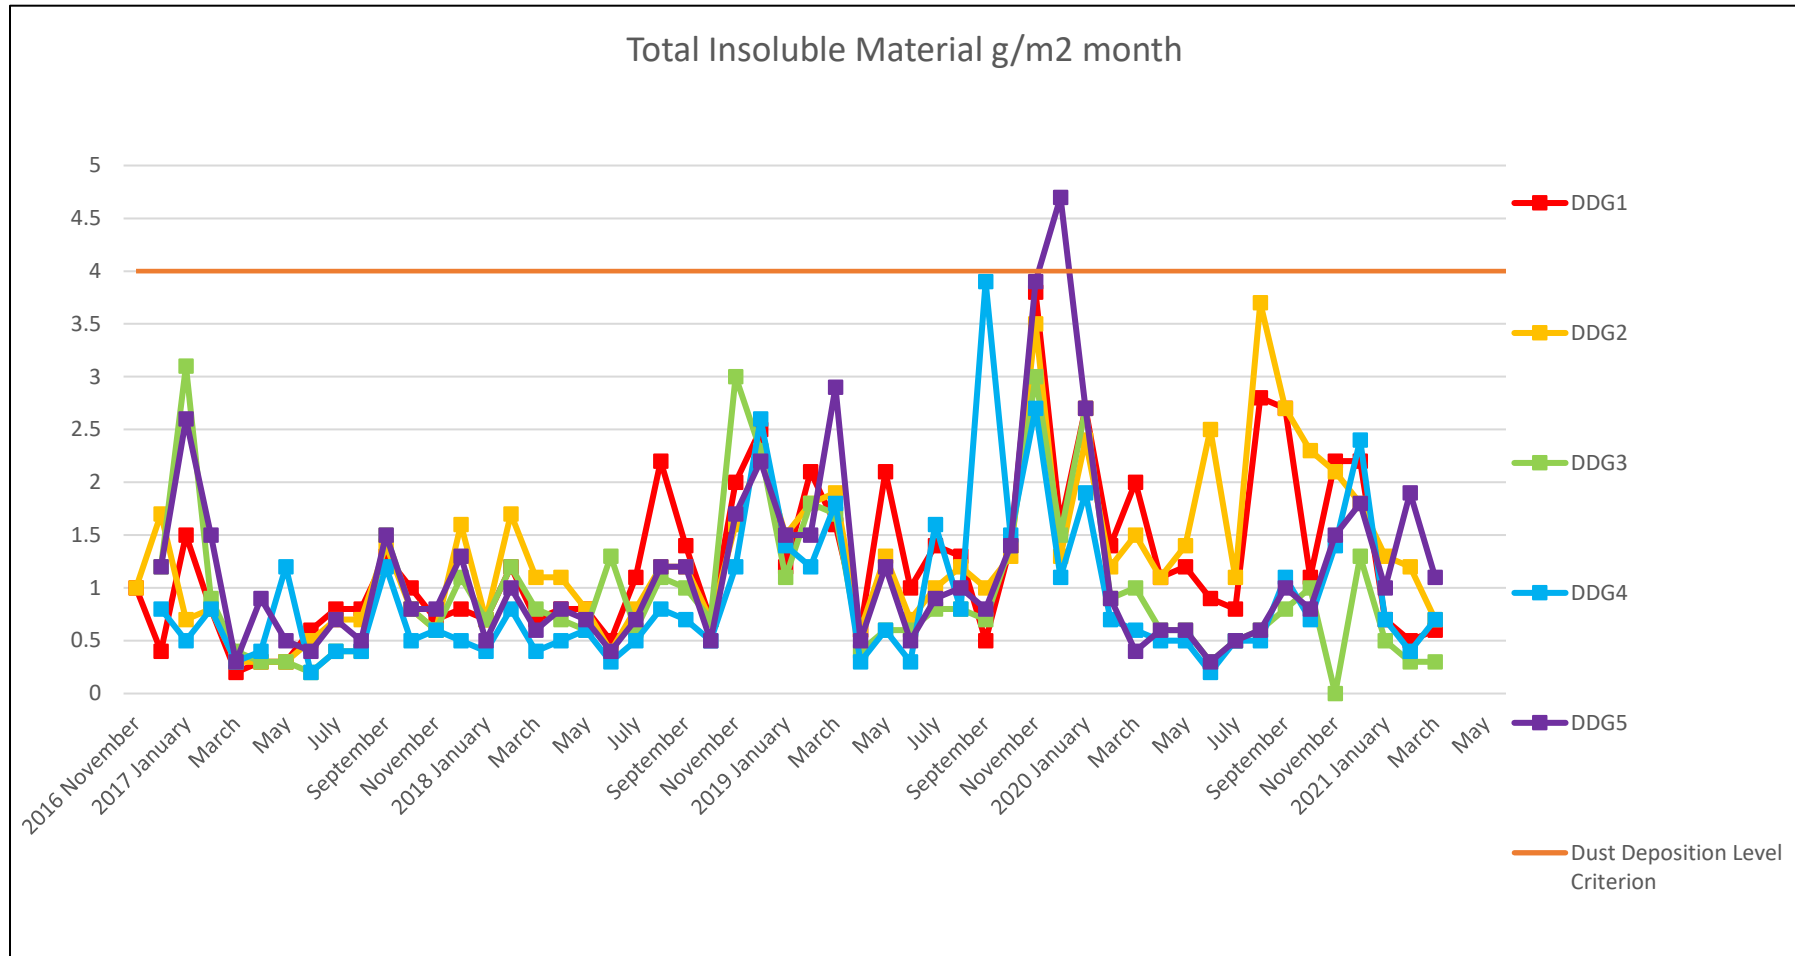

Figure 6-1: Air quality monitoring data

4.4 Biodiversity

4.4.1 Background

Monitoring of the environmental management of biodiversity is undertaken via weekly visual inspections. These inspections include consideration of impacts on native biodiversity, and if there is evidence of noxious weeds or vertebrate pests.

4.4.2 Trends in the monitoring data

The vegetation clearance to facilitate construction of the containment cell was completed in February 2021. The approved clearance boundary (with reductions as proposed by Hydro) had been marked by surveyors and no clearance occurred beyond the approved boundary.

4.4.3 Actual versus predicted impacts

The development consent for SSD 6666 approved the clearance of approximately 1.35 hectares of Kurri Sand Swamp Woodland in the Sydney Basin Bioregion Endangered Ecological Community (EEC) and approximately 1.15 hectares of the Lower Hunter Spotted Gum - Ironbark Forest in the Sydney Basin Bioregion EEC (approximately 2.5 hectares in total). Following a review of the Project vegetation clearance requirements the total area required to be cleared has reduced by approximately one hectare. A pre-clearance survey was undertaken by two ecologists on 22 January 2021. On 28 January 2021 the clearance required to facilitate construction of the Containment Cell was completed under observation by two ecologists.

Other activities predicted in the EIS to have an impact on biodiversity include:

- Pest and weed control
- Remediation of contaminated soils and waste disposal areas as native vegetation adjoins these areas (impacts to be avoided where possible or managed).

Hydro proposes to reduce the vegetation clearance approved by the development consent. An application to modify the approved vegetation clearance area is to be prepared by Hydro.

4.5 Soils

4.5.1 Background

Contaminated site investigations have identified several small areas within the Hydro Land that require remediation. Remediation involves the excavation and removal of the contaminated soils, and disposal within the Containment Cell in accordance with a Remediation Action Plan (RAP). The areas requiring remediation include:

- The Capped Waste Stockpile
- Limited areas within the former Smelter
- The former Municipal Landfill on Hart Road
- Dickson Road South
- Stockpiled asbestos contaminated soils at former residential properties.

Monitoring of the environmental management of contaminated soils and stockpiles, including erosion and sediment controls, is undertaken via weekly visual inspections. The erosion and sediment controls are also to be inspected after a rain event (greater than 5 millimetres in any one period up to 24 hours in duration).

4.5.2 Trends in the monitoring data

The weekly inspection checklists indicate that erosion and sediment controls have been installed and inspected regularly in accordance with the ESCP and the Blue Book. The inspections also note that the controls are operating as designed and any required maintenance has been completed.

4.5.3 Actual versus predicted impacts

The EIS states that erosion and sediment controls would be installed at appropriate locations to divert clean water and to capture and collect soils, dust, and particulates from water runoff.

This prediction is consistent with the inspection results for the compliance reporting period.

4.6 Surface water

4.6.1 Background

Surface water monitoring is undertaken in accordance with the *National Water Quality Management Strategy: Australian Guidelines for Fresh and Marine Water Quality* (ANZECC, 2000) at 10 locations including:

- Dams (ND1 and ND2)
- Swamp Creek (A – up gradient of site, 14 – downgradient of CWS, B – downgradient of CWS, and D – downgradient of Irrigation)
- Wentworth swamp (62)
- Surge Ponds: Eastern Surge Pond (ESP), Southern Surge Pond (SSP) and Western Surge Pond (WSP).

The program includes monitoring of pH, electrical conductivity, free cyanide, free fluoride, total suspended solids (TSS) and total dissolved solids (TDS).

4.6.2 Trends in the monitoring data

Figure 6-2 presents the surface water monitoring data from January 2021 (prior to commencement of the remediation works) to March 2021.

4.6.3 Actual versus predicted impacts

The surface water impact assessment in the EIS indicated that the quality of surface water would not be adversely impacted by the project.

This prediction is consistent with the monitoring results for the compliance reporting period.

4.7 Groundwater

4.7.1 Background

Hydro undertakes quarterly groundwater monitoring from 28 groundwater monitoring wells. The program includes monitoring of the groundwater level and groundwater quality (pH, Electrical Conductivity, Fluoride, Free Cyanide, Dissolved Oxygen and Redox potential).

4.7.2 Trends in the monitoring data

None of the remediation works activities that could potentially impact on groundwater have commenced. As such it is too early to determine if the remediation works are influencing groundwater quality.

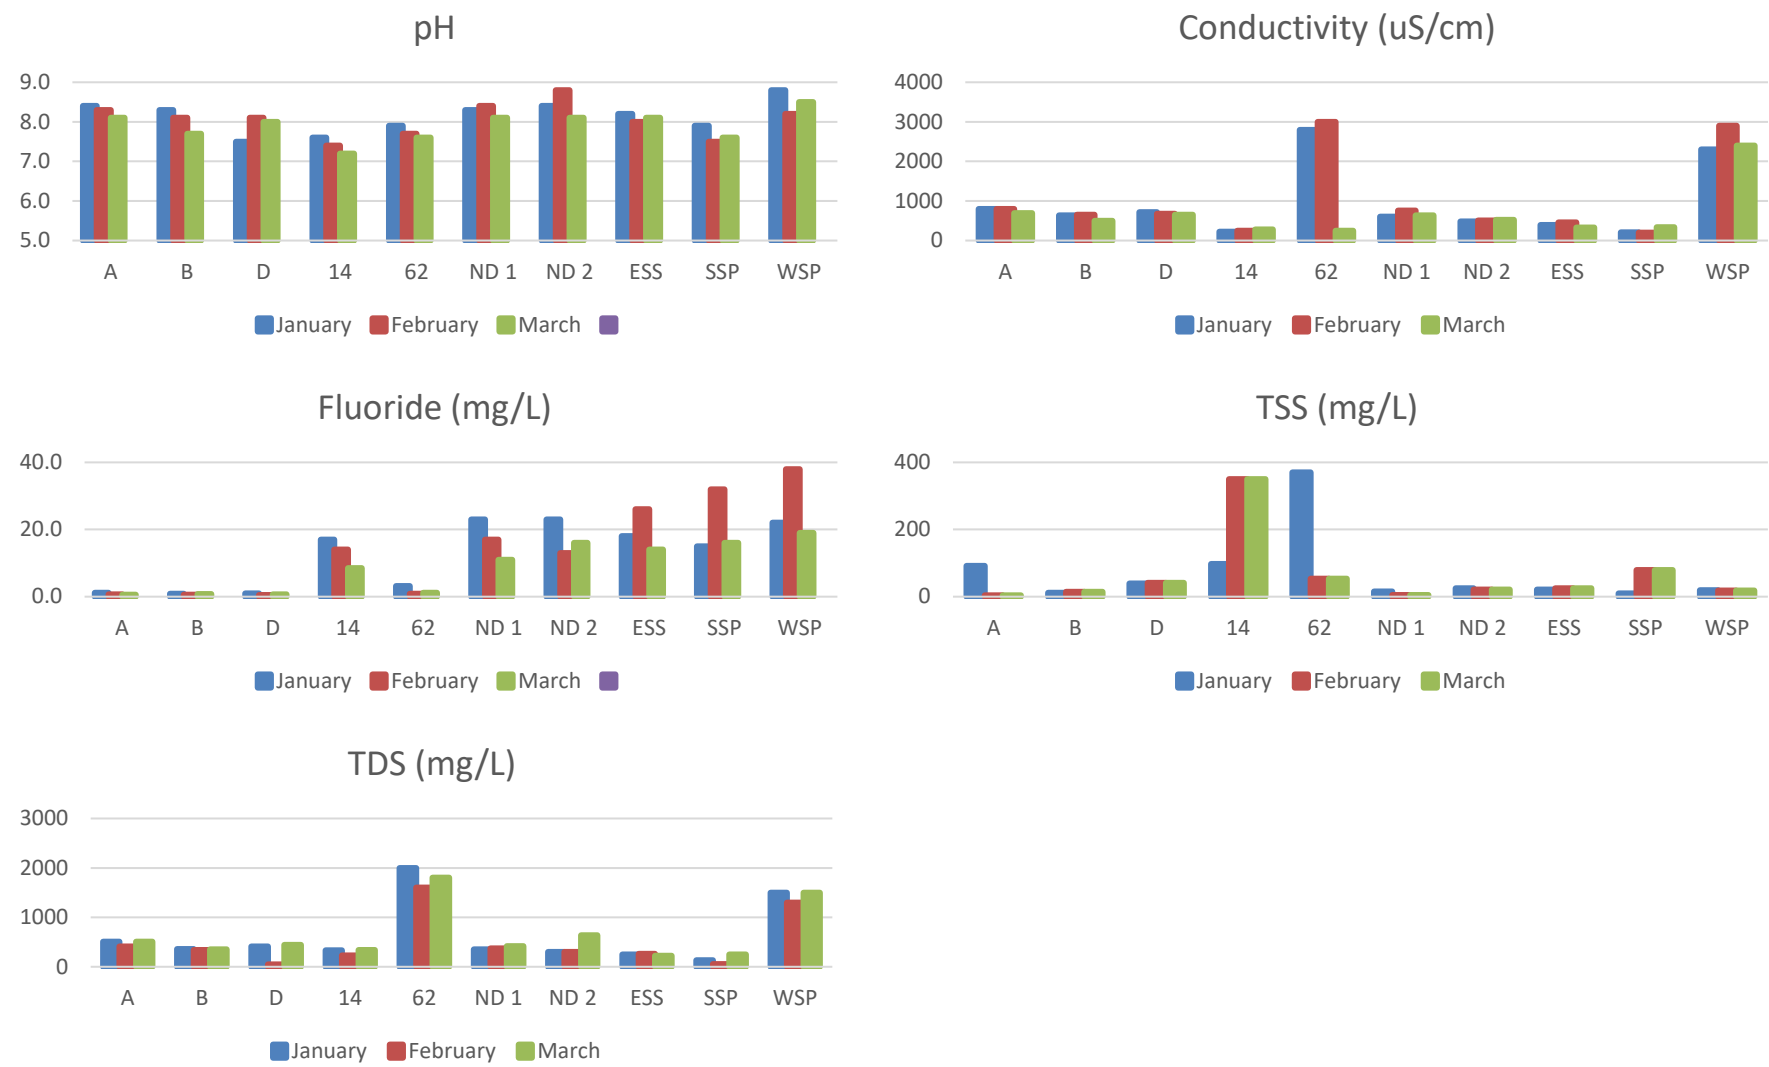

Figure 6-2: Surface water monitoring data

4.7.3 Actual versus predicted impacts

The groundwater impact assessment in the EIS predicted that groundwater is not expected to be encountered during the works except for excavation of the Capped Waste Stockpile and demolition works less than 1.5 metres below ground surface. Aquifer recharge and groundwater quality are not expected to be impacted by the project. Groundwater quality is expected to be improved as a result of remediating the Capped Waste Stockpile.

4.8 Waste

4.8.1 Background

Monitoring of waste during remediation works will be undertaken via record keeping and waste tracking of the following details:

- Quantity and type of liquid and non-liquid waste generated, handled, stockpiled, processed, or disposed of on and off site.
- Details of waste disposal including the quantity, tracking, handling, stockpiling, reuse/recycling and proposed strategies for confirming that waste treatment and/or disposal facilities can lawfully accept waste generated.

4.8.2 Trends in the monitoring data

As this is the first reporting period against SSD 6666 and the handling and disposal of waste generated by the remediation works has not commenced, trends in the monitoring data are not evident.

4.8.3 Actual versus predicted impacts

Hydro has developed a waste inventory, detailing the types and quantities of wastes predicted to be generated by the project as part of the WMP. This will be implemented once remediation works activities that involve waste handling have commenced.

4.9 Stakeholder and community engagement

Stakeholder and community engagement activities undertaken during the compliance reporting period included:

- Activation of the Project website: <https://regrowthkurrikurri.com.au/> on 2 February 2021
- Community Reference Group (virtual) meetings on 18 February 2021 and 18 April 2021

As noted in response to condition B53 in the Compliance Table in Appendix 1 Hydro is consulting with the Department and Hunter New England Health to remove the requirement of condition B53(d) for the Stakeholder and Community Engagement Plan (SEP) to *"identify a community notification area for residents to refrain from using rainwater as a potable water supply during the remediation work"*.

Hydro submitted a request (with justification) for removal of the requirement on 17 February 2021. The Department advised on 23 February 2021 that it required Hydro to consult with Hunter New England Health to seek their agreement to this change (a comment in one of their submissions was the source of this requirement). Hydro issued a letter to Hunter New England Health dated 26 February 2021 seeking their agreement (with Hydro's supporting information) to our request to not include the community notification area. As of 24 April 2021, no response has been received from Hunter New England Health.

5. SUMMARY OF ACTIONS

Table 5-1 describes the measures that will be implemented to improve the environmental performance of the development identified in this Compliance Report.

Table 5-1: Recommended Improvement Actions

Condition of consent number	Action proposed	Proposed completion date
C11	Section 3.5.1.1 ('Remediation Compliance Reporting') of the RWEMP to be amended to reflect the final development consent conditions. The amended RWEMP will be submitted to the Department in accordance with conditions C4 and C5.	27 July 2021
C16	A complaint register to be placed on the Project website (even if no complaints have been received)	27 May 2021
C53	Hydro to follow up with Hunter new England Health regarding their comment on the need for the SEP to identify a community notification area for residents to refrain from using rainwater as a potable water supply during the remediation work	30 April 2021

6. LIMITATIONS

Ramboll Australia Pty Ltd (Ramboll) prepared this report in accordance with the scope of work as outlined in our proposal to Hydro Aluminium Kurri Kurri Pty Ltd dated 20 April 2020 (as revised 21 January 2021) and in accordance with our understanding and interpretation of current regulatory standards.

Site conditions may change over time. This report is based on conditions encountered at the site at the time of the report and Ramboll disclaims responsibility for any changes that may have occurred after this time.

The conclusions presented in this report represent Ramboll's professional judgment based on information made available during the course of this assignment and are true and correct to the best of Ramboll's knowledge as at the date of the assessment.

Ramboll did not independently verify all of the written or oral information provided to Ramboll during the course of this investigation. While Ramboll has no reason to doubt the accuracy of the information provided to it, the report is complete and accurate only to the extent that the information provided to Ramboll was itself complete and accurate.

This report does not purport to give legal advice. This advice can only be given by qualified legal advisors.

6.1 User Reliance

This report has been prepared exclusively for Hydro Aluminium Kurri Kurri Pty Ltd and may not be relied upon by any other person or entity without Ramboll's express written permission.

APPENDIX 1
COMPLIANCE TABLE

27 April 2021

Table A-1: Compliance with Development Consent SSD 6666				
CONDITION OF CONSENT NUMBER	COMPLIANCE REQUIREMENT	DEVELOPMENT PHASE	EVIDENCE AND COMMENTS	COMPLIANCE STATUS
	PART A: ADMINISTRATIVE CONDITIONS			
	OBLIGATION TO MINIMISE HARM TO THE ENVIRONMENT			
A1	In addition to meeting the specific performance measures and criteria in this consent, all reasonable and feasible measures must be implemented to prevent, and if prevention is not reasonable and feasible, minimise, any material harm to the environment that may result from the remediation works and operation of the development, and any rehabilitation required under this consent.	At all times	Activities onsite are undertaken generally in accordance with the RWEMP and sub-plans. The RWEMP provides the system to manage and control environmental aspects of the project during remediation works to prevent environmental harm. No incidents resulting in material harm to the environment have occurred during the compliance reporting period.	Compliant
	TERMS OF CONSENT			
A2	<p>The development may only be carried out:</p> <ul style="list-style-type: none"> a) in compliance with the conditions of this consent; b) in accordance with all written directions of the Planning Secretary; c) in accordance with the EIS and Response to Submissions; d) in accordance with the RAP and CCDDR; e) in accordance with the Development Layout in Appendix 1; and f) in accordance with the management and mitigation measures in Appendix 3. 	At all times	<p>The requirements under this condition are met as follows:</p> <ul style="list-style-type: none"> a) The project has been undertaken in compliance with the conditions of the project consent as evident in this table. b) No written directions have been received by the Planning Secretary. c) Activities undertaken during the compliance reporting period included pre-remediation and site preparation activities as described in Section 1.3 of the Compliance Report. These activities were undertaken in accordance with the EIS and RtS. d) Remediation activities and construction of the Containment Cell have not commenced. 	Compliant

27 April 2021

Table A-1: Compliance with Development Consent SSD 6666

CONDITION OF CONSENT NUMBER	COMPLIANCE REQUIREMENT	DEVELOPMENT PHASE	EVIDENCE AND COMMENTS	COMPLIANCE STATUS
			<p>e) The project is consistent with the layout in Appendix 1 relevant to the activities undertaken during the compliance reporting period.</p> <p>f) The management and mitigation measures in Appendix 3 are incorporated into the RWEMP and sub-plans. The project has been undertaken in accordance with the plans.</p>	
A3	<p>Consistent with the requirements in this consent, the Planning Secretary may make written directions to the Applicant in relation to:</p> <ul style="list-style-type: none"> a) the content of any strategy, study, system, plan, program, review, audit, notification, report or correspondence submitted under or otherwise made in relation to this consent, including those that are required to be, and have been, approved by the Planning Secretary; and b) the implementation of any actions or measures contained in any such document referred to in condition A3(a). 	At all times	<p>The Department provided comments on the draft management plans on 18 June 2020 via email. The plans were updated to address the Department's comments and the final plans were submitted on 22 January 2021. The Department approved the final management plans on 25 January 2021.</p> <p>The Department has provided comment on the Community Engagement Plan, and the need for consultation with Hunter New England Health. Further information is provided in the response to condition B53.</p>	Compliant
A4	The conditions of this consent and directions of the Planning Secretary prevail to the extent of any inconsistency, ambiguity or conflict between them and a document listed in condition A2(c) or A2(d). In the event of an inconsistency, ambiguity or conflict between any of the documents listed in condition A2(c) and A2(d), the most recent document prevails to the extent of the inconsistency, ambiguity or conflict.	At all times	Noted. The project has been undertaken in accordance with the project consent. No inconsistencies, ambiguity or conflicts between any of the documents listed in condition A2(c) and A2(d) are noted.	Compliant

	<p>a) make the following information and documents (as they are obtained or approved) publicly available on its website:</p> <ul style="list-style-type: none"> (i) the documents referred to in condition A2 of this consent; (ii) all current statutory approvals for the development; (iii) all approved strategies, plans and programs required under the conditions of this consent; (iv) regular reporting on the environmental performance of the development in accordance with the reporting requirements in any plans or programs approved under the conditions of this consent; (v) a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs; (vi) a summary of the current stage and progress of the development; (vii) contact details to enquire about the development or to make a complaint; (viii) a complaints register, updated monthly; (ix) the Compliance Report of the development; (x) audit reports prepared as part of any Independent Audit of the development and the Applicant's response to the recommendations in any audit report; (xi) any other matter required by the Planning Secretary; and <p>b) keep such information up to date, to the satisfaction of the Planning Secretary.</p>		<p>A summary of the current stage of the project (C16a(vi)) is included at: https://regrowthkurrikurri.com.au/about-regrowth/.</p> <p>Contact details for enquires or complaints (C16a(vii)) are provided at: https://regrowthkurrikurri.com.au/contact/</p> <p>C16a(viii) As of 24 April 2021 no complaints have been received, and therefore none to be displayed.</p> <p>Recommendation: A complaints register should be placed on the project website (even if no complaints are received). This will allow stakeholders to know that no complaints have been received.</p> <p>C16a(ix-xi) have not been triggered.</p>	

APPENDIX 2

COMPLIANCE REPORT DECLARATION FORM

Compliance Report Declaration Form	
Project name	Hydro Aluminium Kurri Kurri Smelter Remediation Project
Project application number	SSD 6666
Description of project	Remediation of the former Hydro Kurri Kurri Aluminium Smelter site
Project address	Hart Road, Loxford, New South Wales
Proponent	Hydro Aluminium Kurri Kurri Pty Ltd
Title of Compliance Report	Compliance Report 1
Date	27 April 2021

I declare that I have reviewed the contents of the attached Compliance Report and to the best of my knowledge:

- i. the Compliance Report has been prepared in accordance with all relevant conditions of consent;
- ii. the Compliance Report has been prepared in accordance with the Compliance Reporting Requirements;
- iii. the findings of the Compliance Report are reported truthfully, accurately and completely;
- iv. due diligence and professional judgement have been exercised in preparing the Compliance Report; and
- v. the Compliance Report is an accurate summary of the compliance status of the development.

Notes:

- Under section 10.6 of the *Environmental Planning and Assessment Act 1979* a person must not include false or misleading information (or provide information for inclusion in) a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is false or misleading in a material respect. The proponent of an approved project must not fail to include information in (or provide information for inclusion in) a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is materially relevant to the monitoring or audit. The maximum penalty is, in the case of a corporation, \$1 million and for an individual, \$250,000; and
- The *Crimes Act 1900* contains other offences relating to false and misleading information: section 307B (giving false or misleading information – maximum penalty 2 years' imprisonment or 200 penalty units, or both).
